EXPERIENCE

Sixt

Software Engineer

Munich, Germany

2022 - Present

- Developed AWS cloud native microservices to support the business's mobility platform with Spring Boot
- Integrated 3rd party providers to extend the mobility platform offering for customers
- Migrated legacy Java back-end services to Spring Boot to improve system stability
- Extended functionality of legacy Go APIs to support back-office operations using the Micro framework

Sixt

Senior Data Scientist

Munich, Germany

2020 - 2022

- Applied Uber's H3 spatial grid system for intelligent data collection and analysis for competitor tracking
- Developed integer linear programs for fleet assignment and facility location problems using JuMP.jl
- Automated detection of multiple accounts for use in analyses in pure SQL for more accurate reporting
- Developed applications calculating catchment areas based on walk/drive time distances using OSMnx
- Geocoded text addresses for use in GeoSpatial analyses using Nominatim
- Scraped data from external sources for data enrichment using Selenium

Tipico

Data Scientist

St. Julian's, Malta

2017 - 2020

- Developed scoring systems for retail branch performance and customer risk indicators
- Curated external data sets such as sociodemographics for use in location analysis projects
- Developed pipelines, reports, dashboards, and web applications to enable data driven decision making
- Applied machine learning for locating key areas of interest for network expansions
- Developed Spark applications for use in match recommender systems

EDUCATION

Malta College of Arts, Science, and Technology

B.Sc. (Hons) Software Development

Malta

Sep 2014 - Jun 2017

SKILLS

Spoken Languages:	English (C2), Maltese (C1), Italian (B1), German (A2)
Programming Languages:	Python, Java, Go, Bash, Julia, C#
Tools:	Pandas, Numpy, Scikit-Learn, Matplotlib, Protobuf, Gradle, Spark
Analytics:	SQL, Excel, Grafana, Dash, Looker, QuickSight
Web:	HTML/CSS/JavaScript, Flask, Spring Boot, Micro
Other:	AWS, Redshift, Git, Docker, Jenkins, Airflow, Athena, Kafka, Kubernetes

PROJECTS

Predicting Market Turnover *Python, Scikit-Learn* <https://github.com/gabegm/Predict-Market-Turnover>
Candidate test to predict market turnover for the Bundesliga season 17/18

Headcount Planning and Management System *Python, Flask*
<https://github.com/gabegm/Headcount-Planning-Management-System>
Create effective hiring plans, identify gaps, and align with financial performance and business goals

Data Driven Automated Algorithmic Trading *Python, Zipline*
<https://github.com/gabegm/Data-Driven-Automated-Algorithmic-Trading>
Designed and automated an algorithm to trade the stock markets for my bachelor thesis project
